On January 27, 2022, the 40th JCCP International Symposium was held in a hybrid format. In Leaders Panel 1, a lively exchange of opinions took place between government officials of oil- and gas-producing countries in the Middle East and Asia, individuals from Japanese and foreign oil companies, and energy experts on the main theme of the symposium, "Oil and Gas Industry Looks to a Sustainable Future—New Challenges and International Cooperation." There were about 600 online participants, including representatives of the Japanese Ministry of Economy, Trade and Industry; oil-producing countries; respective embassies to Japan; various government organizations; and Japanese and foreign companies and organizations, etc.

Leaders Panel 2 “Management and HR as Strategic Drivers for SDG Goals”

Chairperson:
Dr. SAWA Masahiko
 Senior Executive
 Officer, Manufacturing
 & Technology,
 Idemitsu Kosan
 Co.,Ltd.

Leaders Panel 2 focused on human resource development and business management. While the situation and environment that each country and company has faced during the COVID-19 pandemic differs, the panelists introduced the measures they have taken respectively towards the common goal of achieving the SDGs. An extremely interesting discussion also arose from the survey results on the impacts of COVID-19 on women working in the oil and gas industry in the UAE and Japan. Additionally, during the Q&A session challenges and solutions were shared and the panel recognized anew the significance of information exchange. (From the Chairperson’s summary)

Leaders Panel 3

“Energy Transition: Technology-drive Future Vision – ”

Mr. SAKATA Eiji
Executive Officer /
Division Director,
Solution Business
Division, Plant Solution
Business Unit,
Toyo Engineering Corp.

In Leaders Panel 3, each country introduced how they are considering various methods that correspond to their respective situations for the energy transition towards carbon neutrality and have developed distinct approaches. Efforts for concrete technology development and social implementation already underway were also introduced. Through the panel it was possible to share each country’s situation and explore the potential of international cooperation from a global perspective. Additionally, there was a strong sense that building a valuable global value chain through co-creation with each country, resolving challenges, and total solutions was extremely significant and that it is necessary to continue such initiatives. (From the Chairperson’s summary)
